

Amendment to the Claims

- 1) (Currently Amended) A filament yarn having wicking less than about 6 mm, a static voltage of ~~+/-400 volts~~, between -400 to +400 volts, and a water contact angle greater than or equal to about 65 °, but less than about 90 °.
- 2) (Original) The filament yarn of claim 1, wherein said filament is coated with an aqueous fluorocarbon chemical.
- 3) (Original) The filament yarn of claim 1, wherein said filament yarn is selected from the group of polyesters, poly(alpha)olefins, polyamides and acrylics.
- 4) (Original) The filament yarn of claim 1, further including anti-static agents, biocides, coloring agents (dyes and pigments), coupling agents, flame retardants, heat stabilizers, light stabilizers, lubricants, plasticizers and mixtures of a plurality of these.
- 5) (Currently Amended) A fabric comprising woven filament yarn having wicking less than about 6 mm, a static voltage of ~~+/-400 volts~~, between -400 to +400 volts, and a water contact angle greater than or equal to about 65 °, but less than about 90 °.
- 6) (Original) The fabric of claim 5, wherein said filament is coated with an aqueous fluorocarbon chemical.
- 7) (Original) The fabric of claim 6, wherein said filament yarn is selected from the group of polyesters, poly(alpha)olefins, polyamides and acrylics.
- 8) (Original) The fabric of claim 5, used in a sign, banner, awning or tent.
